

ABSTRACT OF THE DISCLSOURE

A method and system delivers documents to terminals with limited display capabilities, such as mobile terminals. More specifically, a method and system adapt a document in order to make same displayable on a terminal with limited display capabilities. The method includes: determining the processing and display capabilities of a terminal; analyzing the document page that is to be displayed by the terminal in order to determine the characteristics thereof, the image resulting from the conversion having a resolution that is selected as a function of the characteristics of the document, such that the contents of the document page are legible on the screen of the terminal; converting one page of a document to a graphical or semi-graphical format that is selected as a function of the processing and display capabilities of the terminal; and transmitting at least part of the image of the converted document page to the terminal.
